<b>Basic Course Informatio</b>	n
--------------------------------	---

Semester	Spring 2016	Instructor Name	Dr. Alejandro Cozzani
Course Title & #	Physical Science 110	Email	alex.cozzani@imperial.edu
CRN #	20062	Webpage (optional)	Refer to Blackboard
Room	2731	Office	2767
Class Dates	February 16-June 10, 2016	Office Hours	Mondays through Thursday 7:00
	Deadline to drop class with W:		to 7:30 AM.
	May 14, 2015		Mondays and Wednesdays
			12:50 to 1:50 PM.
Class Days	Tuesdays and Thursdays	Office Phone #	760-355-5720
Class Times	11:20 AM - 12:45 PM	Office contact if	Silvia Murray 760-355-6201 or
		student will be out	Ofelia Duarte 760-355-6155
Units	3.0	or emergency	

# **Course Description**

This course is designed to give an understanding of the fundamental principles of physics and chemistry as they relate to the structure and properties of matter and the principles of motion and energy, for the liberal studies student.

## **Student Learning Outcomes**

- 1. Conceptualize the fundamental differences between mass and weight and between speed and velocity, using illustrative examples.
- 2. Through experimentation involving the use of levers, students will investigate and apply the principle of Conservation of Energy to simple machines.
- 3. Distinguish between series and parallel circuits, identifying their advantages and disadvantages.

# **Course Objectives**

- 1. Describe the motion of objects based on position, displacement, velocity, speed, and acceleration.
- 2. Recognize that forces (pushes and pulls) such as gravity, magnetism and, friction act on objects and may change their motion if these forces are not in balance.
- 3. Recognize the differences between kinetic energy, potential energy, work, power, and their application to machines.
- 4. Know the difference between weights and masses and weights of objects using the Universal Law of Gravitation.
- 5. Know the difference between temperature and heat and know the laws of thermodynamics.
- 6. Describe the methods of heat transfer and know the phases of matter and how one phase is converted to another.
- 7. Recognize the differences between electrical forces, voltages, currents, resistance, series circuits, and parallel circuits.
- 8. Understand the origin of magnetic forces and their application in meters, motors, and generators.
- 9. Describe wave motion including longitudinal and transverse waves and applications to sound waves.
- 10. Understand the origin of light waves and the application of frequency to the electromagnetic spectrum and color.
- 11. Know the difference between reflection and refraction of light.
- 12. Understand the composition of the atom and the classification of atoms by the periodic table.
- 13. Understand atomic structure and identification of atoms using a spectroscope.
- 14. Understand properties of the nucleus including fission, fusion, and radioactive decay.
- 15. Recognize physical and chemical properties of elements and compounds.
- 16. Understand mixtures and determining means of classifying and separating them.
- 17. Understanding ionic, polar, covalent and metallic bonds.
- 18. Describe chemical reactions.
- 19. Understand the chemical properties of acids and bases.

# **Textbooks & Other Resources or Links**

**Textbook**: Conceptual Physics Science (5<sup>th</sup>Edition) (ISBN 978-0321752932) with Mastering Physics OR Conceptual Physical Science (5<sup>th</sup>Edition) /A la Carte Edition (ISBN 978-0321804198).

Author: Hewitt, Paul G., John Suchocki, and Leslie A. Hewitt.

# **Course Requirements and Instructional Methods**

- 1. Special Project:
  - a. A written report and PowerPoint presentation will be assigned according to students' preferences and presentation dates will be according to the calendar of topics. The written report should be at least five pages long, size 12, double space, about five bibliography sources, about 20 slides, and a one-page summary for classmates.
  - b. Please refer to grading rubric found in Blackboard.
  - c. Please bring your own computer.
  - d. Both, PPT and report must be turned in (hard copy or electronically) on or before the presentation day.
  - e. IF YOU ARE ABSENT THE DAY YOU ARE ASSIGNED TO PRESENT, YOUR GRADE IS ZERO (0), NO EXCEPTIONS!
- 2. Homework:
  - a. **Option A:** The purpose of homework is to provide the student with sufficient practice to master all topics studied in class and to do well on tests. Homework can be done online at <u>www.masteringphysics.com</u>.
    - i. **Course ID: MPCOZZANI78033.** Please refer to webpage for deadlines. You are required to complete an overall 80% to get full credit, otherwise your score will be your percent converted to points.

b. **Option B**: You are required to answer any <u>20</u> questions from the end of each chapter (except for the RAT because answers are provided).

- Chapters 1-4 due on or before exam # 1 (NO EXCEPTIONS!),
- Chapters 6-11 due on or before the mid-term (NO EXCEPTIONS!),
- Chapters 12-18 due no later than June 02, 2016 (NO EXCEPTIONS!).
- 3. **Study Time/Groups**: It is up most important that students review the material to do well on exams. Students are encouraged to form study groups and to meet regularly to keep up with assignments and to study for test/mid-term/final exam. It is recommended to invest at least two hours for every hour spent in class (Around 6 hours per week).
- 4. **Exams**: All exams are multiple-choice and include questions and problems. Students will not be allowed to make up <u>any</u> exams.

# **Course Grading Based on Course Objectives**

The student's grade will depend on the following areas (not on total points):

$\triangleright$	Special Project (Oral/Written)	20% (100points)
$\triangleright$	Homework	20% (100points)
$\succ$	Exam # 1 (Chapters 1-4)	15% (75 points)
$\triangleright$	Mid-term (Chapters 6-11)	20% (100 points)
$\succ$	Final Exam (Chapters 12-18)	25% (125 points)
≻	Total	100%

All grades are calculated by using the standard scale of:

**A = 100-90% B = 89-80% C = 79-70%** D = 69-60% F = 59% and below

# Blackboard displays two grades: the weighted and the total. Your grade is the weighted one, so please keep it in mind.

Attendance

• A student who fails to attend the first meeting of a class or does not complete the first mandatory activity of an online class will be dropped by the instructor as of the first official meeting of that class. Should readmission be desired, the student's status

will be the same as that of any other student who desires to add a class. It is the student's responsibility to drop or officially withdraw from the class. See General Catalog for details.

- Regular attendance in all classes is expected of all students. A student whose continuous, unexcused absences exceed the number of hours the class is scheduled to meet per week may be dropped. For online courses, students who fail to complete required activities for two consecutive weeks may be considered to have excessive absences and may be dropped.
- Absences attributed to the representation of the college at officially approved events (conferences, contests, and field trips) will be counted as 'excused' absences.

### **Classroom Etiquette**

- <u>Electronic Devices</u>: Cell phones and electronic devices must be turned off and put away during class unless otherwise directed by the instructor.
- <u>Calculators</u>: scientific calculators can be used during class time and exams. NO phones or tablets as a substitute for calculators during exams.
- Table of equations/Periodic Table: Are allowed during tests. Please refer to Blackboard to print them out.
- <u>Food and Drink</u>: are prohibited in all classrooms. Water bottles with lids/caps are the only exception. Additional restrictions will apply in labs. Please comply as directed.
- <u>Disruptive Students</u>: Students who disrupt or interfere with a class may be sent out of the room and told to meet with the Campus Disciplinary Officer before returning to continue with coursework. Disciplinary procedures will be followed as outlined in the General Catalog.
- <u>Children in the classroom</u>: Due to college rules and state laws, no one who is not enrolled in the class may attend, including children.

# **Online Netiquette**

- What is netiquette? Netiquette is internet manners, online etiquette, and digital etiquette all rolled into one word. Basically, netiquette is a set of rules for behaving properly online.
- Students are to comply with the following rules of netiquette: (1) identify yourself, (2) include a subject line, (3) avoid sarcasm, (4) respect others' opinions and privacy, (5) acknowledge and return messages promptly, (6) copy with caution, (7) do not spam or junk mail, (8) be concise, (9) use appropriate language, (10) use appropriate emoticons (emotional icons) to help convey meaning, and (11) use appropriate intensifiers to help convey meaning [do not use ALL CAPS or multiple exclamation marks (!!!!)].

# **Academic Honesty**

- <u>Plagiarism</u> is to take and present as one's own the writings or ideas of others, without citing the source. You should understand the concept of plagiarism and keep it in mind when taking exams and preparing written materials. If you do not understand how to correctly 'cite a source', you must ask for help.
- <u>Cheating</u> is defined as fraud, deceit, or dishonesty in an academic assignment or using or attempting to use materials, or assisting others in using materials, or assisting others in using materials, which are prohibited or inappropriate in the context of the academic assignment in question.

Anyone caught cheating or plagiarizing will receive a zero (0) on the exam or assignment, and the instructor may report the incident to the Campus Disciplinary Officer, who may place related documentation in a file. Repeated acts of cheating may result in an F in the course and/or disciplinary action. Please refer to the General School Catalog for more information on academic dishonesty or other misconduct. Acts of cheating include, but are not limited to the following: (a) plagiarism; (b) copying or attempting to copy from others during an examination or on an assignment ;(c) communicating test information with another person during an examination; (d) allowing others to do an assignment or portion of an assignment, (e) use of a commercial term paper service.

#### **Additional Help**

- Blackboard support center: http://bbcrm.edusupportcenter.com/ics/support/default.asp?deptID=8543
- <u>Learning Labs</u>: There are several 'labs' on campus to assist you through the use of computers, tutors, or a combination. Please consult your college map for the Math Lab, Reading & Writing Lab, and Learning Services (library). Please speak to the instructor about labs unique to your specific program

• <u>Library Services</u>: There is more to our library than just books. You have access to tutors in the learning center, study rooms for small groups, and online access to a wealth of resources.

## **Disabled Student Programs and Services (DSPS)**

Any student with a documented disability who may need educational accommodations should notify the instructor or the Disabled Student Programs and Services (DSP&S) office as soon as possible. The DSP&S office is located in Building 2100, telephone 760-355-6313 if you feel you need to be evaluated for educational accommodations.

## **Student Counseling and Health Services**

Students have counseling and health services available, provided by the pre-paid Student Health Fee. We now also have a fulltime mental health counselor. For information see <u>http://www.imperial.edu/students/student-health-center/</u>. The IVC Student Health Center is located in the Health Science building in Room 2109, telephone 760-355-6310.

### **Student Rights and Responsibilities**

Students have the right to experience a positive learning environment and due process. For further information regarding student rights and responsibilities please refer to the IVC General Catalog available online at http://www.imperial.edu/index.php?option=com\_docman&task=doc\_download&gid=4516&Itemid=762

#### **Information Literacy**

Imperial Valley College is dedicated to help students skillfully discover, evaluate, and use information from all sources. Students can access tutorials at <a href="http://www.imperial.edu/courses-and-programs/divisions/arts-and-letters/library-department/info-lit-tutorials/">http://www.imperial.edu/courses-and-programs/divisions/arts-and-letters/library-department/info-lit-tutorials/</a>

# **Anticipated Class Schedule / Calendar**

The calendar is tentative and it may be modified according to students 'needs.

WEEK # START DAY	CORE CONTENT	% OF COURSE	READING	ASSIGMENT DUE
1-February 15	Syllabus / Introduction		 Chapter 1	
2-February 22	Patterns of Motion and Equilibrium Newton's Laws of Motion	7% 7%	Chapter 1 Chapter 2	
3-February 29	Newton's Laws of Motion Momentum and Energy	7% 5%	Chapter 2 Chapter 3	
4- March 07	Newton's Law of Universal Gravitation Thermal Energy and Thermodynamics	2% 5%	Chapter 4 Chapter 6	
5- March 14	Heat Transfer and Change of Phase	6%	Chapter 7	Exam # 1 Chapters 1-4

ch 21	Static and Current Electricity	7%	Chapter 8	
h 28	Spring Break			No Classes
il 04 N	lagnetism and Electromagnetism	6%	Chapter 9	Presentations
il 11	Waves and Sound	4%	Chapter 10	Presentations
	Light Waves/Properties of Light	4%	Chapter 11	
il 18	Review for Mid-term			
	Mid-term		Chapters 6-11	Mid-term
ril 25	Atoms and the Periodic Table	4%	Chapter 12	Presentations
ay 02	Atomic Models	5%	Chapter 12	Presentations
iy 09	The Atomic Nucleus	8%	Chapter 13	Presentations
	Elements of Chemistry	6%	Chapter 14	
ay 16	Mixtures	4%	Chapter16	Presentations
	How Atoms Bond	5%	Chapter 15	
ay 23	Chemical Reactions	5%	Chapter 17	Presentations
	Acids and Bases	5%	Chapter 18	
iy 30	Review for Final Exam			Presentations
e 06	Day 1: Final Exam			Final Exam
	Day 2: Final Grades			Chapters 12-18
